

Feature-packed Slitting & Rewinding Machines

Enhanced performance and cost-efficiency

Applications:

- ◆ For stationery, insulated, and wide-ranging packaging & printing paper
Thickness: 20G/M²~500G/M²

MODEL MW-ND	1400MM	1800MM SHAFTLESS STAND
Designed Speed	25~380 M/min	30~550 M/min
Maximum Slitting Width	1300 MM	1700 MM
Minimum Slitting Width	20 MM	30 MM
Paper Weight	20~400 GSM	50 ~ 500GSM
Maximum Unwinding Diameter	1000 MM	1500 MM
Maximum Rewinding Diameter	1000 MM	1500 MM
Maximum Load for Unwind	700 KG	2000 KG
Unwinding Stand	3" Air Shaft	3~6" Chuck
Rewinding Air Shaft	3"	3"
Machine Dimensions	2x2.2x1.5 M	2.3x1.2x1.7 M / 1.2x2.9x1.7 M
Main Inverter	5HP total 8HP	10HP total 15HP

Features:

- Air-inflated shaft makes collecting and unloading material easy
- Supreme tension controller makes material thickness adjustment easy
- Guarantees perfect tension while collecting materials of different diameter and thickness
- Well-equipped but compact equipment w/human-machine interface enhances working efficiency
- Reduces at least 40% power consumption, guaranteeing eco-friendliness and reduction of carbon emission
- Concealed transmission to stop contamination by dust, foreign-object to minimize time and labor for maintenance
- Low noise for more worker-friendly environment
- Easy to change slitting sizes & specs

KH-ND

For medium / small-sized paper rolls
