Material:
 Pacifier: Medical grade platinum silicone, withstand temperature up to 310°C.
 Pacifier housing: PPSU/PC/POLYDNE, withstand temperature up to 120°C.

Features:

- Medical grade platinum silicone that can withstand temperature up to 310°C and will not deform under high temperature or release harmful chemicals, nor containing BPA.
- Safety design with pull retention force twice than breast, meets the standards in the US and Europe. The parts do not dislodge, hence do not pose the risk of accidental swallowing by baby.
- Has passed rigorous tests of ISO 10993, including tests for irritation and sensitization, and cytotoxicity. The product is a functional upgrade and a safety upgrade.
- Leaving no coating of the soogla at the lip effectively prevents the adhesion of food residue and tongue coating to help babies stay away from bad breath and bacterial infection.
- Comes with durable container to make storage more convenient and hygienic.
- The 5th generation pacifier of US Baby that employs the world unique silicone technology to meet the most stringent safety demands of mothers.

Caution:

- Suggested five minutes sterilization in 310°C high temperature.
- Sterilize the pacifier in US Baby Steam Sterilizer before and after each use, and putting it at a clean place not accessible by mosquitoes.
- Clip US Baby Pacifier Choke on baby's clothes when using Pacifier to ensure safety and sanitation.
- Please keep away from fire and to avoid the touch of sharp substance.

Packing : 1pc
 Date of Manufactured : As on the Package
 Storage Time : 10 years
 Made in Taiwan

US Baby Pacifier should be used for 1 year.
 Baby who is or one is growing up. Babies get sense of satisfaction and happiness through the movement of sucking.
