

ABOUT 3D TECH

3D Tech was established in year 2008 as a design solutions provider and high quality electronics assemblies supplier. In 2010, 3D Tech was formally incorporated as an SME (Electronic Manufacturing Services).

3D Tech's core strengths are manufacturing in process control and high performance electronics assemblies and designed to precise customer specifications.

From high mix low volume to low mix high volume, our dedicated team of skilled engineers and technicians apply the same exacting quality standards to all that we do.

Our clients know they can rely on a highly responsive service and exceptional quality products time after time. So when you choose to outsource to 3D Tech, you choose a partnership you can trust.

MANUFACTURING SOLUTIONS & FACILITIES

Our three purpose built manufacturing sites feature some of the most advanced automatic assembly, inspection and test equipment available.

- Full turnkey contract manufacturing
- Product design and process optimisation
- Value added engineering services to enhance performance and to reduce cost
- Surface mount assembly lines
- Through hole wave soldering (nitrogen enhanced)
- State of the art automatic optical inspection systems (AOI)
- In circuit and functional testing (ICT)
- Bare board facilities
- Box build assembly lines
