Takano Machinery Company (formerly known as Kao Yeh Machine Industrial Co.), with its headquarters in New Taipei City, Taiwan, is a premiere manufacturer and supplier of slitter rewinders and converting solutions for paper, non-woven and polymer film industries around the globe.

Since 1972, thousands of Takano slitters have been installed. With the ever changing dynamic of the economy, the company has adapted and transformed into a fully integrated customer-driven solutions provider for your specific converting needs. We offer cost-effective tailor-made slitters with unparalleled quality and service.

Our competence stems from years of experience in working with our customers for their specific requirements from concept, design and fabrication to trial-run and final acceptance.

Be it a paper, coated paper, non-woven, PET film, coated film, laminated paper/film or optical film in clean room operation, let TAKANO work with you to fulfill your converting needs.

KY-A402
