

Cold Forged & Turned Auto Parts

Shining Jins Enterprise engaged in manufacturing and supply precision forged & formed metal components to numerous markets in Taiwan and Malaysia.

We specialize in coaxial symmetrical items such as deep socket, pin, crank pin, roller, bush, spacer, special rivet, and fastener. The material varies upon clients request including carbon steel, alloy steel and stainless steel etc.

Produce Capabilities :

- Up to 150mm Outside diameters & 100mm length
- Secondary operations equipment, CNC turning, auto lathe, thread rolling, drilling, broaching, sandblasting, assemble and install, allows products to be customized to suit your specific requirements
- Surface Treatment

Cold Forged and Turned Industrial Metal Parts

Since 1975, Shining Jins Enterprise has been dedicated to screws products and fasteners manufacturing is a professional cold-forged special fasteners supplier and also an experienced cold forged & turned metal parts manufacturer in Taiwan.

The material varies upon clients request including carbon steel, alloy steel and stainless steel etc.

Produce Capabilities :

- General industrial applications cold-forging metal parts
- Automobile and Motorcycle cold-forging parts
- Various thread forming and rolling machining
- Shafts & special-headed metal parts
- Customized cold forging fasteners
- Headed rivet, plug bolt and pin

Customized Cold Forged & Turned Metal Parts

Shining Jins Enterprise is a professional manufacturer of forging and cold-forging metal parts to numerous markets products. The combination of cold forging and forming saves on some machining operations, leading to considerable cost reductions. We provide high quality and compatible products for different requests and wishes from clients. And not only offering good products but also offering turning precision machining metal part and special thread parts.

Advantages of cold forged products :

- Material savings
- Eliminate and/or reduce additional machining operations
- Improved strength, mechanical properties, grain flow
- Improved surface finish vs machined products
- High-speed production
- Less scrap

Cold Forged and Turned Industrial Fasteners

Shining Jins Enterprise is a professional manufacturer of forging and cold-forging metal parts to numerous markets products. The combination of cold forging and forming saves on some machining operations, leading to considerable cost reductions. We provide high quality and compatible products for different requests and wishes from clients. And not only offering good products but also offering turning precision machining metal part and special thread parts.

Produce Capabilities :

- Up to 150mm Outside diameters & 100mm length
- Secondary operations equipment
- CNC turning & various thread forming
/ ISO thread (metric), Whitworth thread, Pipe thread
Trapezoidal thread, Knuckle thread, Buttruss thread
- Heat treatment and other surface treatment

Cold Forged & Turned Metal Parts

Shining Jins Enterprise is an experienced cold forging factories in Taiwan. Our products have been used in various industries. Our team has dedicated to cold forging technology and metal product manufacturing processes for more than thirty years.

We will design the best manufacturing processes for you & will turn your concepts into actual products.

Produce Capabilities :

- General industrial applications cold-forging metal parts
- Automobile and Motorcycle cold-forging parts
- Various thread forming and rolling machining
- Shafts & special-headed metal parts
- Customized cold forging fasteners
- Headed rivet, plug bolt and pin

Cold Forging & Stamping Metal Parts

General industrial applications cold forging auto parts
Seamless Pipe series products add machining process
Various thread forming and rolling machining
Automobile and Motorcycle cold forging parts
Headed rivet, plug bolt and pin for casters
Shafts & special-headed metal parts
Custom made cold forged fasteners
Plastic Insert molding metal parts
Cold forging loud-Speaker parts
Forged and Turned metal parts
Forged Fitting Adapters
Engineering component
Roller and collar pipe
Power Tools parts
